Upgrade Your Existing Xplorer with the Advanced Electronics of the

XPLORER² upgrade

Technologies are constantly changing and upgrades keep you ahead of the competition. **The Xplorer 2™ Upgrade** is a simple drop-in replacement for the original Xplorer nuclear gauge electronics. This upgrade includes many advanced features such as Bluetooth®, GPS, large LCD display and so much more. Installation only takes minutes and can be performed with just a few simple tools. Get your upgrade today and start taking advantage of these great new features!

- **GPS** for geographic coordinates and altitude information.
- **Large backlit LCD and keypad** makes reading test results easy at night or in direct sunlight.
- **Bluetooth® enabled** for easy data transfer to any Android® smartphone or tablet.
- **USB port** for quick storage of all test data.
- **Reporting software** built into the **X2 Mobile Application** can send all test results via email with just a few clicks.
- **Integrated battery port** for connection to supported external gauge location tracking devices.
- **9 volt backup battery** keeps you on the job in case the main battery charge runs out.

*Easy & affordable upgrade for
your original Xplorer gauge.*
